UFO Observations

JUL 28 1965

Hq USAF SAFOICC (Mrs Hunt)
Wash D C 20330

1. Reference the attached letters from [REDACTED] requesting information on their observations of 13 and 19 July 1965.
2. The objects which they observed on the nights of 13 and 19 July 1965 are similar to observations of satellites. The inconsistencies in flight can be attributed to conditions in the atmosphere and illusion of the satellite's appearance as it nears stars or other lights in the sky.
3. The objects were not ECHO I or II, PEGASUS I or II. These are the only four satellites on which we have schedules. However, there are over thirty satellites visible to the unaided eye and six are as bright or brighter than ECHO I. Identification of the satellites might possibly be obtained from either the Smithsonian Institute or from NASA.

Eastlake, Ohio

Dear Sirs:

I would like to report a U.F.O.
~~It~~ It was Wed. July 17 at 10:10 to
10:25 going west to East Trajectory.
It moved in a jerky fashion sometimes.
It didn't go exactly in a straight line.
Sometimes it went from West to South or
South to north in instant jerks.

I would like to know if you have
righted such such a U.F.O. at that time
or anything at that time.

Thank you

P.S. It was a spot like a ~~_____~~
star with no other lights.
